

HOPPER

Hopper is a practical table with an attention-grabbing design. The possibility of adjusting the height of the table, 535-730 mm, makes it adaptable to other furniture and environments. The function is activated by pressing the button on the table top. The technical features are concealed in the pillar design. Rotatable glides are a detail that enables you to pull the table closer towards you. The table top is available in metal, glass or solid wood. The solid wood top in white pigmented ash and clear lacquered oak has an attractive tray edge. Metal top and frame in CbM* powder coating. The frame is also available in chrome for table tops in glass and wood.

*CbM = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black and white
